ABSTRACT: The human **T cell transcription factor**-4 (hTCF-4) interacts functionally with beta-catenin in the Wnt signaling pathway, which regulates many developmental processes. Moreover, inappropriate reactivation of this pathway attributable to APC or beta-catenin mutations has been described in colorectal cancers. Because only the human TCF-4 cDNA sequence was known, we determined its genomic structure. A total of 17 exons, of which 5 were alternative, were identified. Moreover, four alternative splice sites were observed either experimentally or in silico by a BLAST approach in expressed sequence tag databases. The alternative use of three consecutive exons localized in the 3' part of the hTCF-4 gene changes the reading frames used in the last exon, leading to the synthesis of a number of hTCF-4 isoforms with short, medium, or long-size COOH-terminal ends. We next screened the entire hTCF-4 gene for mutations in a series of 24 colorectal cancer cell lines by denaturing gradient gel electrophoresis and/or direct sequencing. Besides an already described deletion of an A in an (A)9 coding repeat in four cases, we found DNA variants in eight cases for a total of 12 variants, of which 8 were coding. These include one frameshift **mutation** in the beta-catenin binding domain (exon 1), and one missense **mutation** in exon 4. In the remaining six cases, nonsense or frameshift mutations were localized in the 3' part of the gene. These latter alterations have as a common consequence to decrease the proportion of the long COOH-terminal hTCF-4 isoform, which contains two binding domains for c-terminal binding protein, a protein implicated in the repression of the TCF family transcriptional activity. Thus, loss of the TCF-4 capacity to interact with COOH-terminal binding protein

could be an important event during colorectal carcinogenesis by modifying Wnt signaling.

LEF and TCF transcription factors (referred to collectively as LEF/TCFs) are pivotal players in the molecular pathology of cancer of the intestinal tract. Mutant components of the Wnt signal transduction cascade invariably lead to the inappropriate activation of LEF/TCFs in the cancer cell. A new study provides evidence for an unexpected amplification step in this cascade. The inappropriate activity of the Wnt pathway in colorectal cancer cells induces the expression of **LEF1**, which is normally not expressed in intestinal epithelium.

DESCRIPTORS:
Alleles...
A or C, of TCF-1 gene; TCF-1 gene polymorphic allele A (with mutation C883.fwdarw.A) assocd. with Th1 and Th2 diseases and therapeutic and diagnostic methods thereof
Primers(nucleic acid)... Probes(nucleic acid)...
allele-specific; TCF-1 gene polymorphic allele A (with mutation C883.fwdarw.A) assocd. with Th1 and Th2 diseases and therapeutic and

diagnostic methods thereof
Asthma...
allergic; TCF-1 gene polymorphic allele A (with mutation C883.fwdarw.A) assocd. with Th1 and Th2 diseases and therapeutic and diagnostic methods thereof
Allergy...
atopy; TCF-1 gene polymorphic allele A (with mutation C883.fwdarw.A) assocd. with Th1 and Th2 diseases and therapeutic and diagnostic methods thereof
Population genetics...
by analyzing Hardy-Weinberg disequil.; TCF-1 gene polymorphic allele A (with mutation C883.fwdarw.A) assocd. with Th1 and Th2 diseases and therapeutic and diagnostic methods thereof
Genetic element...
exon, 2, of TCF-1 gene; TCF-1 gene polymorphic allele A (with mutation C883.fwdarw.A) assocd. with Th1 and Th2 diseases and therapeutic and diagnostic methods thereof
Transcription factors...
gene TCF-1; TCF-1 gene polymorphic allele A (with mutation C883.fwdarw.A) assocd. with Th1 and Th2 diseases and therapeutic and diagnostic methods thereof
T cell(lymphocyte)...
helper cell/inducer, TH1, diseases assocd. with; TCF-1 gene polymorphic allele A (with mutation C883.fwdarw.A) assocd. with Th1 and Th2 diseases and therapeutic and diagnostic methods thereof
T cell(lymphocyte)...
helper cell/inducer, TH2, diseases assocd. with; TCF-1 gene polymorphic allele A (with mutation C883.fwdarw.A) assocd. with Th1 and Th2 diseases and therapeutic and diagnostic methods thereof
Gene,animal...
HLA-DRB1, anal. of TCF-1 locus interaction with; TCF-1 gene polymorphic allele A (with mutation C883.fwdarw.A) assocd. with Th1 and Th2 diseases and therapeutic and diagnostic methods thereof
Histocompatibility antigens...
HLA-DR3, locus for, anal. of TCF-1 locus interaction with; TCF-1 gene polymorphic allele A (with mutation C883.fwdarw.A) assocd. with Th1 and Th2 diseases and therapeutic and diagnostic methods thereo
Histocompatibility antigens...
HLA-DR4, locus for, anal. of TCF-1 locus interaction with; TCF-1 gene polymorphic allele A (with mutation C883.fwdarw.A) assocd. with Th1 and Th2 diseases and therapeutic and diagnostic methods thereo
Chromosome...
human X, locus on, anal. of TCF-1 locus interaction with; TCF-1 gene polymorphic allele A (with mutation C883.fwdarw.A) assocd. with Th1 and Th2 diseases and therapeutic and diagnostic methods thereof
Oligonucleotides...
immobilized; TCF-1 gene polymorphic allele A (with mutation C883.fwdarw.A) assocd. with Th1 and Th2 diseases and therapeutic and diagnostic methods thereof
Diabetes mellitus...
insulin-dependent; TCF-1 gene polymorphic allele A (with mutation C883.fwdarw.A) assocd. with Th1 and Th2 diseases and therapeutic and diagnostic methods thereof
Diagnosis...
mol.; TCF-1 gene polymorphic allele A (with mutation C883.fwdarw.A) assocd. with Th1 and Th2 diseases and therapeutic and diagnostic methods thereof
Mutation...
point, C883.fwdarw.A in TCF-1 gene; TCF-1 gene polymorphic allele A (with mutation C883.fwdarw.A) assocd. with Th1 and Th2 diseases and therapeutic and diagnostic methods thereof
Genetic polymorphism...
single nucleotide; TCF-1 gene polymorphic allele A (with mutation C883.fwdarw.A) assocd. with Th1 and Th2 diseases and therapeutic and

diagnostic methods thereof
Allele frequency... Disease,animal... DNA sequences... Drug screening...
Gene therapy... Genetic vectors... Genotyping(method)... Human... Molecular
cloning... Multiple sclerosis... Nucleic acid hybridization...
PCR(polymerase chain reaction)... Protein sequences...
TCF-1 gene polymorphic allele A (with mutation C883.fwdarw.A) assocd.
with Th1 and Th2 diseases and therapeutic and diagnostic methods
thereof
Gene,animal...
TCF-1; TCF-1 gene polymorphic allele A (with mutation C883.fwdarw.A)
assocd. with Th1 and Th2 diseases and therapeutic and diagnostic
methods thereof
